About BALUR...

Imagined with long crystal lathes harmoniously arranged in various geometric profiles, BALUR luminaires offer a variety of choices and many extensive variations of curves, sizes or even ornaments in order to make you feel the absolute dazzling simply by the object.

The audacious shapes profiled by metal structures allow those who contemplate these lights to have the impression that it comes to life through light: here definitely comes the genius of forms associated with the emotion of brilliance.

The main characteristic of our family of **BALUR** luminaires is that it consists of several long glass crystals in rows, fixed on a nickel-plated metal structure.
