#### • WHO ARE WE?

#### The family SPIRIDON believes that all projects and ideas could be materialized.

We are convinced that originality and quality are not exclusive and that these are two key elements when designing your interiors. That is why we offer a wide range of lightings and the possibility to produce your own personalized chandeliers.

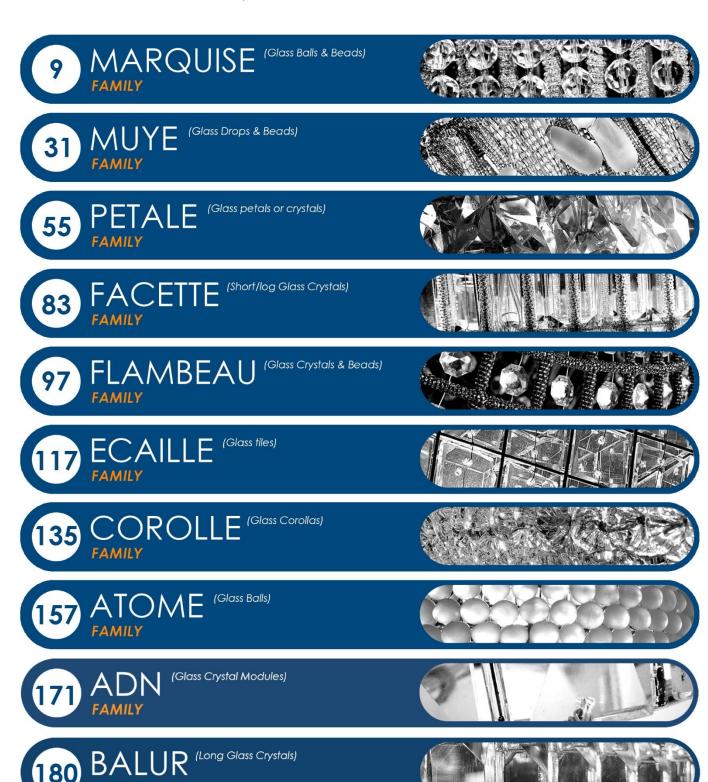

In addition to the collection displayed, any of our model can be modified upon your request. Helped by young designers, our team supports you for any taylor-made product and will guide you through all the step of the creation. Moreover, we offer to the architects and to our professional partner all the help they are needing to make their project a success.

Constantly looking for a perfect consumer experience, we engage ourselves to require from our workshop a dedicated work. Thanks to an exigent selection of our raw materials, the quality of the artisanal manufacture of our products is guaranteed. Our close relationship with our partners allows us to answer quickly to any of your specific needs.

#### SUMMARY

#### Our lighting collections are grouped by style families.

Glass petals, crystals, pearls or facets, discover and let yourself be inspired by our creations and craftsmanship.

### MARQUISE FAMILY

#### **About MARQUISE...**

All the charm of the baroque united in a single family of lighting! With MARQUISE, immerse yourself in the refinement of times when elegance was an art of living; in this family of products, all the glass beads that make up the lights are delicately faceted, then arranged in impressive lines in a way that pearls enhance their sparkles.

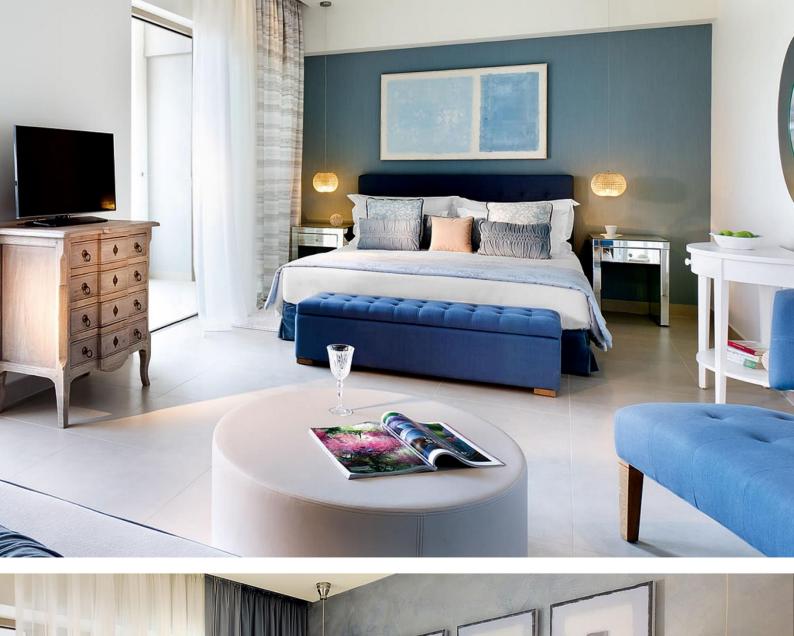

All of this, combined with the characteristic curved shapes of this style, definitely creates an exquisite impression of voluptuousness, fineness and delicate luxury.

The main characteristic of our family of **MARQUISE** luminaires is that it consists of faceted glass marbles fixed on a nickel-plated metal structure covered or not by glass beads.

All models of the MARQUISE family are available with color WB (White Brillant)

#### **About MUYE...**

Discover the MUYE family, immediately recognizable by its unique and amazing manufacturing: the exceptional composition of the family's luminaires creates an impression of a shower of light that shines along suspended wires, all covered with pearls and extended by a glassdrop - particularity of this product line.

In addition the visual feeling that emerges is unique: waterfalls, droplets, showers... It's not a random fact if we named our models with so evocative names.

#### MUYE definitely is the meeting of light and water.

The main characteristic of our MUYE luminaire family is that it consists of long strings of glass beads, extended by a glass drop, all suspended on a nickel-plated metal structure.

All MUYE models have a main finish **WB** (Clear) but can also have other finishes on request (black, mat, colors, ...)

# PETALE FAMILY

# **About PETALE...**

Which better collection among our products than the PETALE family can evoke the richness of floral art ?

As a real homage to the beauty that nature offers, but always in our particular ranges of glass craftsmanship, we have been able to present here the shaping of cut crystals by combining them with the liveliness of raw glass to create budding models, all in elegance and serenity.

The watchword of this family definitely is beauty, a beauty that takes its source at the rendezvous of floral art with light.

The main characteristic of our **PETALE** luminaire family is that it consists of an assembly of a multitude of glass petals or glass crystal, fixed on a nickel-plated metal structure.

Three finishes are available for each model of the **PETALE** family: **WB** (*Petal Clear*), **WM** (*Petal Mat*) and **WT** (Cut Clear)

# FACETTE FAMILY

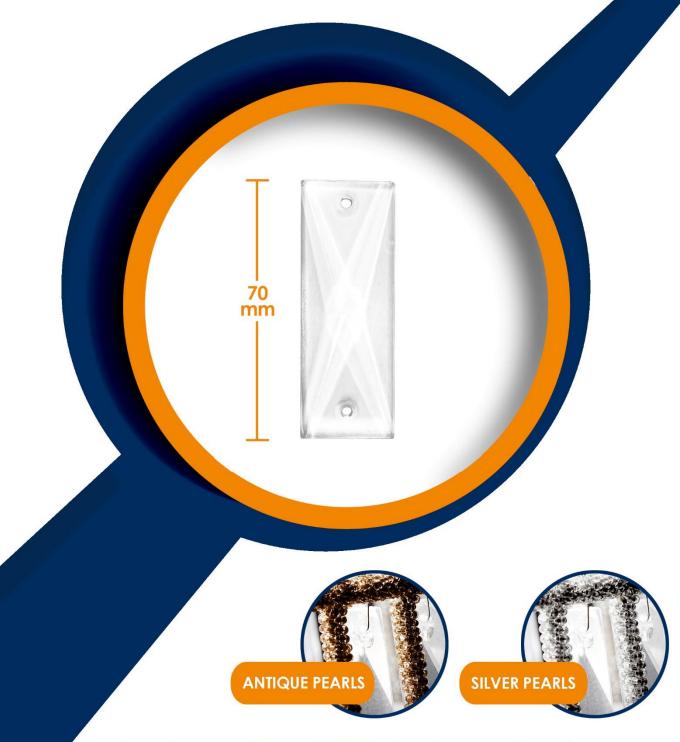

Spiridondeco.com Deco

## **About FACETTE...**

Imagined with long crystal lathes harmoniously arranged in various geometric profiles, FACETTE luminaires offer a variety of choices and many extensive variations of curves, sizes or even ornaments in order to make you feel the absolute dazzling simply by the object.

The audacious shapes profiled by metal structures allow those who contemplate these lights to have the impression that it comes to life through light: here definitely comes the genius of forms associated with the emotion of brilliance.

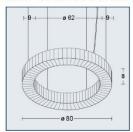

The main characteristic of our **FACETTE** luminaire family is that it consists of several rectangular glasses in rows, fixed on a nickel-plated metal structure fully covered by glass beads with Antique or Silver finishes.

# **About FLAMBEAU...**

A unique and refined atmosphere, with sparkles between subtle shades of lights and shadows ... who better than our family of FLAMBEAU models are able to warmly illuminate your interior while affirming the know-how of our workshops?

The collections that make up this family have all become essentials in interior design. Universal, timeless, these models have been shining all over the world for many years and have made the great reputation of our brand.

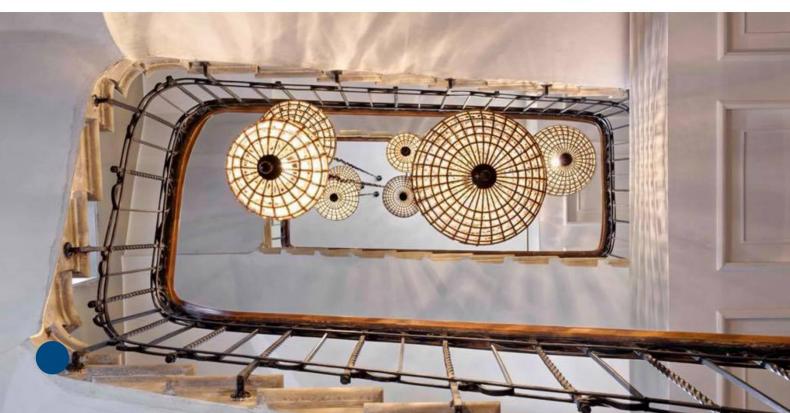

The main characteristic of our **FLAMBEAU** luminaire family is that all models are composed of a metallic structure entirely or lightly covered with small glass beads, with glass crystals fixed on the structure. Some models also have copper elements.

Depending on the collection, the models are available with more (F) or less (S) beads, or with two finishes: **AN** (antic) or **SI** (silver)

ECAILLE FAMILY

## **About ECAILLE...**

Lights and colors come together with the ECAILLE family, a incredible range of luminaires all composed of delicate colored glass tiles, suspended or inserted in perfectly regular structures, creating the perfect combination of light and geometric purity.

Discover the only family of products with color tones, and in particular the "Mirror finish" and its exceptional composition, which creates a sparkling and dazzling effect like iridescent scales reflecting all the surrounding rays of light.

Several colors are availables for each model of the **ECAILLE** family:

BZ (Bronze) GM (Cuivre) K (Black) WB (White Brillant) WM (White Mat) ZM (Silver Mirror)...

# COROLLE

# **About COROLLE...**

COROLLE constitutes a particular universe in our collections: imagined by our studio like a harmonious set of wall lights, suspended lights or table lamps that evokes a delicate romanticism.

Available in matte or glossy version to best suit to your interior, COROLLE will create a scintillating atmosphere created by a multitude of glass petals, delicately assembled upon a fine metal structure, invisible to the eye.

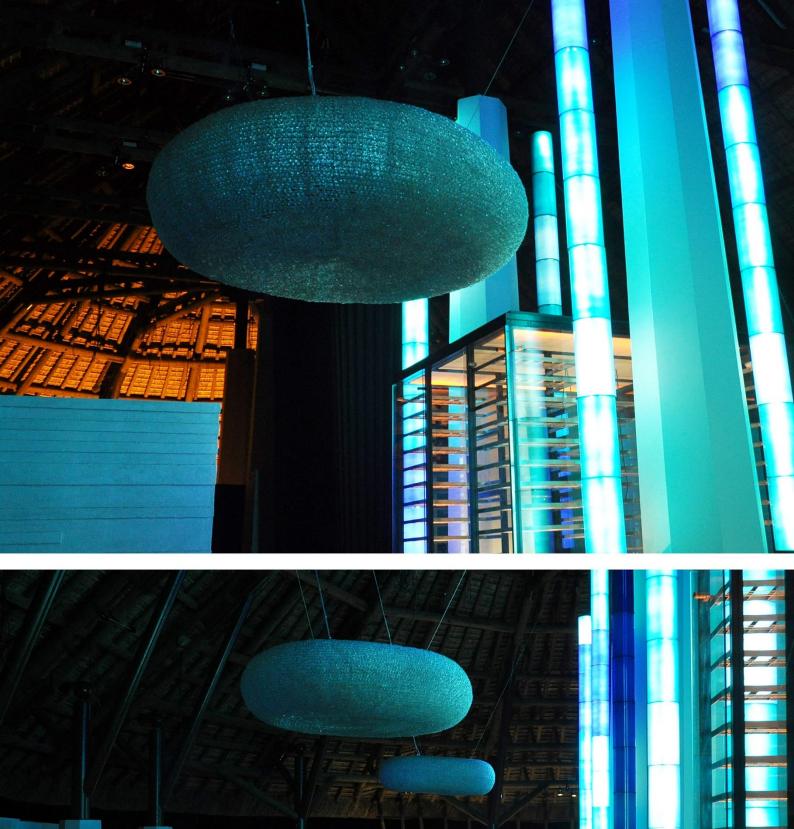

That's luminous. That's near magnificient. With COROLLE, simply be dazzled!

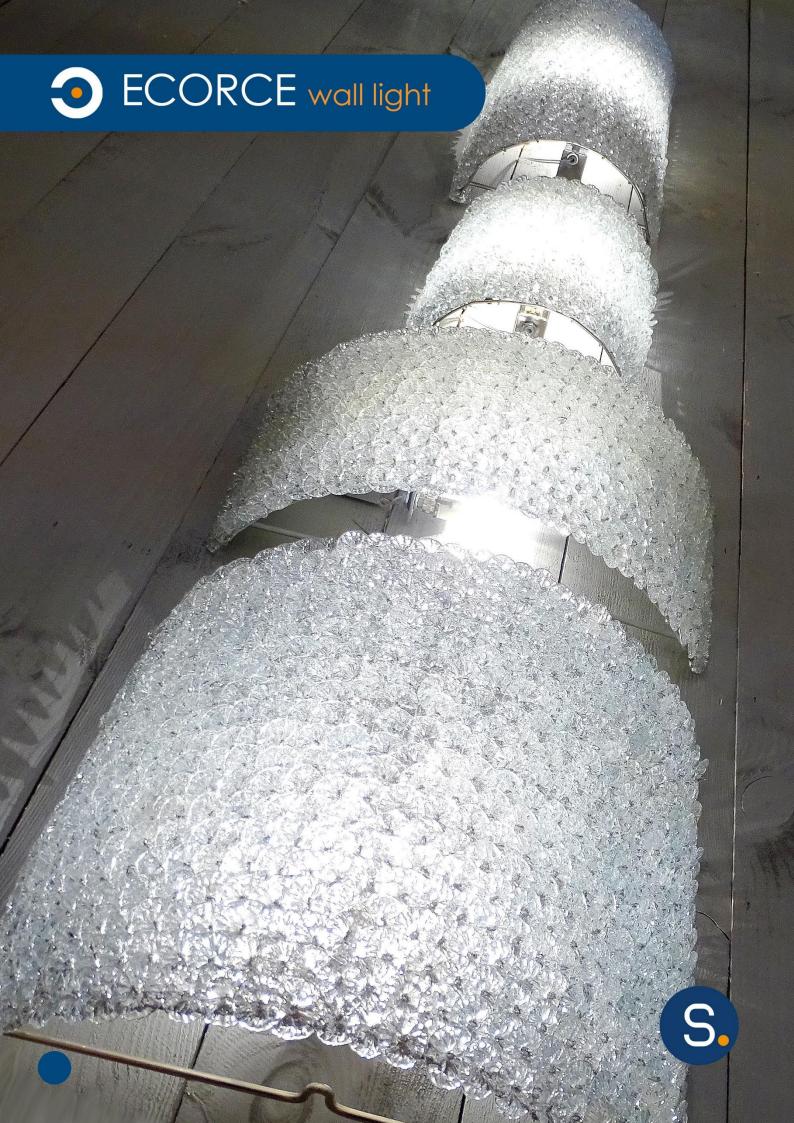

The main characteristic of our **COROLLE** luminaire family is that it consists of an assembly of a multitude of crowns of glass flower petals, held on a nickel-plated metal structure by a small transparent glass bead.

Two finishes are available for each model of the **COROLLE** family: **WB** (clear) and **WM** (mat)

ATOME FAMILY

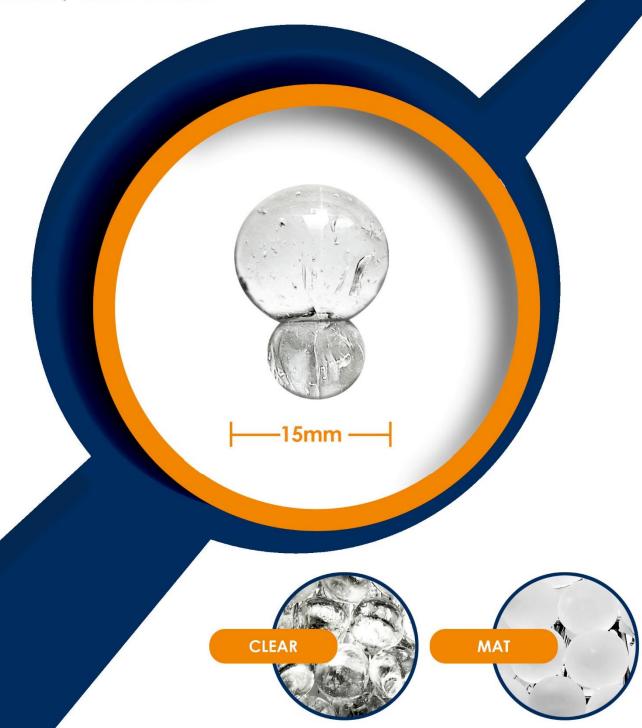

#### **About ATOME...**

Let us present you ATOME, an amazing family of lamps evoking bouquets of flowers, sparkling with a thousand lights everywhere. But what makes them so unique?

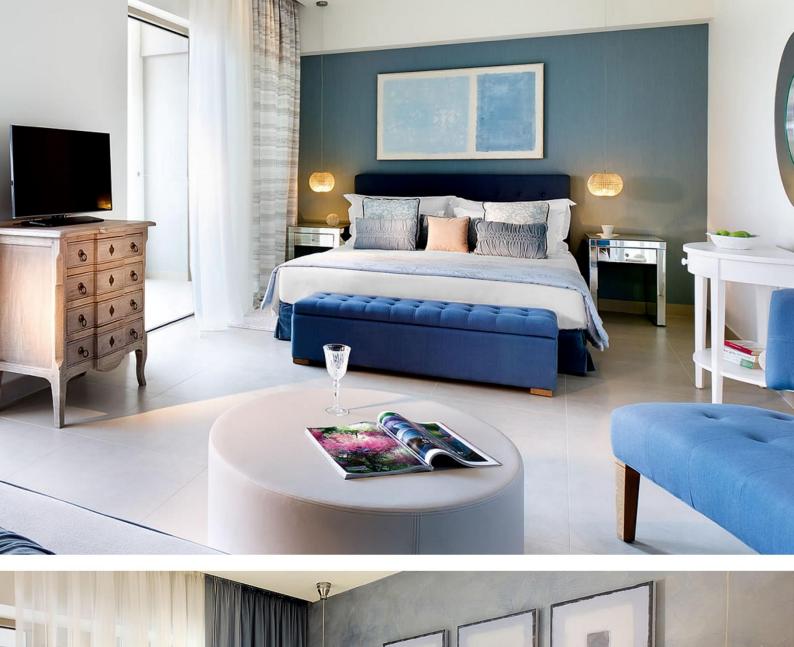

This is because ATOME is not only a unique visual identity, it's also the product of an original manufacturing process: each of its ball is made from recycled glass, then it is blown and assembled on a thin galvanized metal structure ensuring the perfect curve of our models, with the projection of astonishing sparks of light.

#### Be amazed by the effects of ATOME!

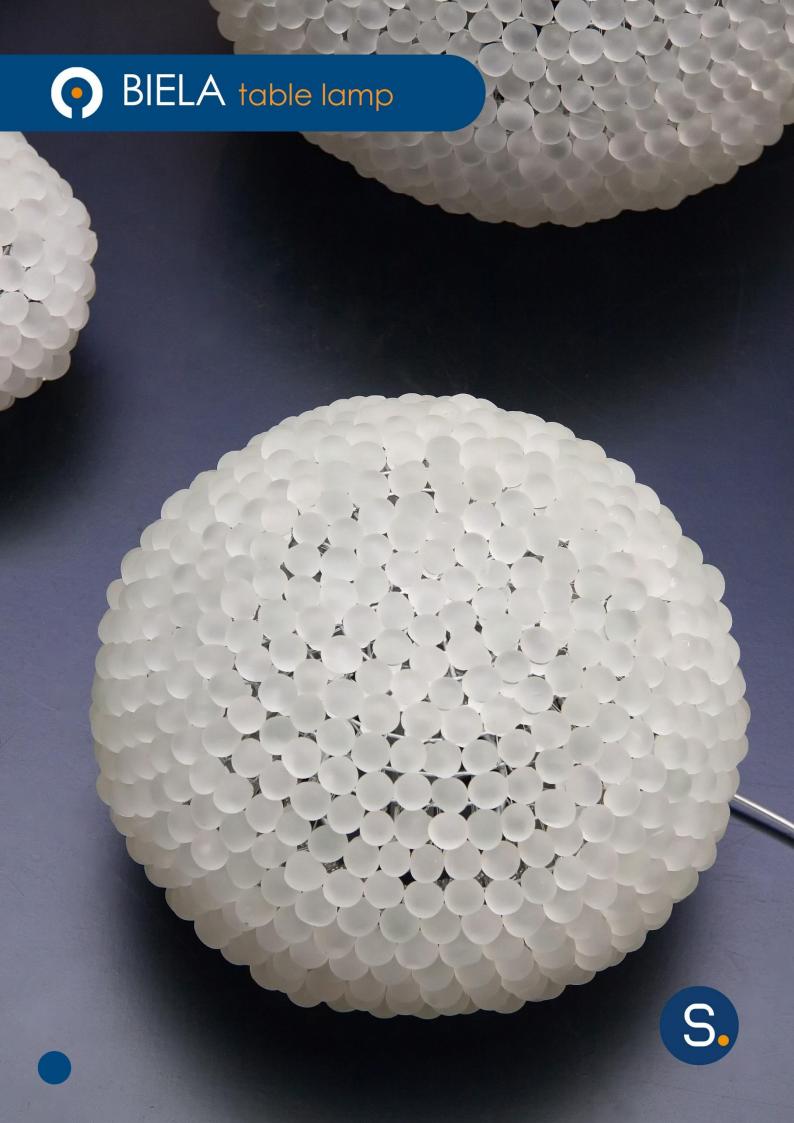

The main characteristic of our **ATOME** luminaire family is that it consists of an assembly of a multitude of glass balls, fixed on a nickel-plated metal structure.

Two finishes are available for each model of the **ATOME** family: **WB** (clear) and **WM** (mat)

# **About BALUR...**

Imagined with long crystal lathes harmoniously arranged in various geometric profiles, BALUR luminaires offer a variety of choices and many extensive variations of curves, sizes or even ornaments in order to make you feel the absolute dazzling simply by the object.

The audacious shapes profiled by metal structures allow those who contemplate these lights to have the impression that it comes to life through light: here definitely comes the genius of forms associated with the emotion of brilliance.

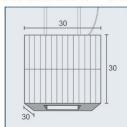

The main characteristic of our family of **BALUR** luminaires is that it consists of several long glass crystals in rows, fixed on a nickel-plated metal structure.

# **OUR LUMINARIES ADAPT TO ALL YOUR PROJECTS!**

Our studio and our workshops offer you great freedom of customization so that you can really design your projects or arrange your interior in an optimal and unique way.

# CUSTOMIZATION

Our entire collection is fully customizable in terms of color / finish, height / diameter, materials, suspension length, socket type, ... to suit any interior design.

# **CREATION**

We also offer a tailor-made creation service with very fast production times to meet the deadlines of each project.

# **RESOURCES**

In addition to the materials presented, we also have an international network of partner suppliers from whom we can source the elements required to meet all your requirements.
